

The Northview curriculum is structured to provide all students with a strong problem solving background including the process as follows:

- 4.3.1 (a) Analyze a problem; (b) design and develop a solution; (c) implement the solution; (d) evaluate the results.
- 4.3.2 Northview fosters a sense of students not being fearful of problem solving by understanding the problem solving process and trusting its value.
- 4.3.3 Northview provides students with the environment to apply the principles they have learned in all curricula.
