

Creativity and innovation are hallmarks of the American society. To compete regionally, nationally and internationally, our students must be provided with opportunities to exhibit creative behavior.

- 4.2.1 Northview's curriculum and activities provide opportunities for every student to improve their creative thinking process and provides them with opportunities to put into practice the lessons learned.
- 4.2.2 Tools to foster creativity are identified, provided, and taught to students.
- 4.2.3 Students are given experiential opportunities to creatively demonstrate the use of these tools.
