

January 31, 2020

Dear Northview families,

We are excited to announce that on January 24 our Board of Education unanimously approved ballot language for a May 2020 school bond proposal.

This bond would result in a no tax increase millage (based on current growth rate models) that would generate \$36.7M for the district. The Northview community will be asked to vote on this school bond proposal on May 5, 2020. If approved, each school building and every major department across the district would see renovations, updates and improvements. This bond proposal focuses on three major district goals:

INVESTING IN OUR SCHOOLS

- Update classrooms with new flexible furniture
- Replace aging and inefficient roofs, boilers and windows
- Install new signage
- Install air conditioning in all K-8 buildings
- Upgrade restrooms

ADDRESSING SAFETY AND SECURITY

- Add secure vestibules at elementary and middle schools
- Install new playgrounds at all elementary schools
- Replace buses that have reached the end of their useful life

KEEPING PACE WITH NEW TECHNOLOGY

- Upgrade instructional and building technology
- Enrich spaces that encourage collaboration and hands-on learning

Over the coming weeks, we will be sharing important information about the bond, our plans and projected timelines. We will also be gathering feedback from staff and our community, so stay tuned. For now, please visit our website for additional details: <http://nvps.net/bond/>.

Sincerely,

Dr. Scott Korpak, Superintendent
Northview Public Schools

Dr. Doug L. Fleur, President
Northview Board of Education
